

I'm appalled by all the political bashing appearing on just about every station on XM Radio and I'm not too happy about it and wondering why I should even have this privilege of having such a wonderful breakthrough in radio choices. It's bad enough that we get inundated with spam from all these nutcases every single day and night, but I don't want to hear it on my radio. Yes, I understand "Freedom of Speech," but this just doesn't cut it. Please do something about this immediately!! Thank you.
